V. COLLEGE ISSUES

C. IT Project Management Contract

BACKGROUND:

The third-party assessment conducted, in September, of the Information Technology (IT) area strongly recommended that FVCC contract with a project manager. Project management services would provide support and assist IT in the coordination of numerous critical projects that impact students and employees.

FVCC conducted a RFP process. Four proposals were received. The review committee identified Dearbrook as having the most and extensive experience working with higher education and especially community colleges. Dearbrook has a proven “track record” of success with similar projects.

It is recommended that the Board approve the President continue to work with Dearbrook to finalize a contract for project management.
